Profile

I have 3 years of experience working in an IT agency, where I have been involved in building portfolios, e-commerce, reservation websites, as well as news portals. With over 40 websites published and maintained, I believe I have a strong grasp of how a modern website should look and feel. Additionally, consistently collaborating with in-house designers has ensured that I possess a solid understanding of how beautiful designs go hand in hand with flawless functionality. I am currently focused on improving my skills in JavaScript based frameworks such as React.js and Next.js
